📇 PROFILE

Hi, I'm Hikmet Melik Fırat — a frontend developer who enjoys building clean, user-focused web experiences. I'm someone who loves learning new things, staying curious, and always looking for ways to improve both my skills and the work I do.

I'm a strong communicator and really enjoy working in collaborative environments. I believe good teamwork and a positive attitude can make a big difference in any project. Whether it's exploring new technologies or refining small UI details, I'm always focused on creating solutions that are both functional and enjoyable to use.

💼 PROFESSIONAL EXPERIENCE

2025/03 – present
İstanbul, Turkey

Software Developer
PeakEye Group ⧉

2024/12 – 2025/04
Turkey

Turkcell Frontend Bootcamp
Turkcell Gelecegi Yazanlar ⧉

Completed a 5-month intensive bootcamp focused on modern frontend development practices. Gained hands-on experience and solid proficiency in the following areas:

- **HTML, CSS, SCSS/SASS, Bootstrap:** Built responsive and accessible web interfaces using semantic HTML, modular SCSS, and Bootstrap's utility-based grid system.
- **JavaScript & TypeScript (ES6+):** Developed interactive features using modern JavaScript and TypeScript, emphasizing functional programming, asynchronous operations, and DOM manipulation.
- **React.js & Next.js:** Created dynamic, component-based applications using React. Built scalable web apps with Next.js, leveraging features like server-side rendering, routing, and API routes.
- **State Management (Zustand, Redux)** Applied global state management patterns to maintain application state across components efficiently.
- **Responsive & User-Centered Design:** Designed mobile-friendly, user-focused interfaces with performance and usability in mind.

2023/07 – 2023/08
Erzurum, Turkey

Internship
Argekip Bilisim Teknolojileri

- Developed an application which name is CustomerApp.
- Enabled simple CRUD operations to be done with this application.
- Used MongoDB, Node.js and Flutter for tech stack.

🧠 SKILLS

Database — *MongoDB* | *SQLite* | *Postgressql*

Backend — *Prisma*

Frontend — *Next.js* | *React.js* | *Javascript/Typescript* | *Tailwind CSS* | *Bootstrap* | *SCSS/SASS* | *CSS* | *HTML*

🎓 EDUCATION

Samsun, Turkey

Ondokuz Mayıs University
Computer Engineering

📁 PROJECTS

2025

Turkcell GYGY Final Task ⬈
Turkcell Frontend Bootcamp Final Task
Next.js 15, React 19, SCSS, React Bootstrap, Zustand, Supabase, next-intl
I developed a platform that allows users to track cryptocurrencies by integrating real-time market data from CoinMarketCap and TradingView APIs. Registered users can create a list of favorite coins and view detailed charts for selected coins. Data is securely stored using Supabase, while Zustand handles global state management. The app supports light/dark mode through React Bootstrap's theming feature and includes multilingual support via next-intl.
Used Technologies
- Next.js 15, React 19
- React Bootstrap, SCSS
- Zustand
- Supabase
- next-intl

2025

Turkcell GYGY Midterm ⬈
Turkcell Frontend Bootcamp Midterm Task
I creatively combined the world of superheroes with software concepts in this project. Using only HTML, SCSS, and Bootstrap, I developed a responsive, modern, and user-friendly interface. The design emphasizes mobile compatibility and visual balance.
Used Technologies
- HTML, SCSS, Bootstrap

2025

Hikmet Melik Portfolio ⬈
Next.js Portfolio Website
My website is where people can easily access my work.
Used technologies
- Next.js 14, React.js 18, Tailwind CSS
- Three.js
- Framer Motion

My site has reached 768 users and continues to reach people. (Data obtained with Microsoft Clarity.)

2024

Blog Web Site ⬈
Blog web site with Next.js & React.js
Used Technologies
- Frontend: **Next.js 14** and **React.js 18**
- Backend: Serverless Postgres **Neon** and **Prisma**
- Styling: **Tailwind CSS** and **Shadcn UI**
- **Project Github Link** ⬈

2024

ClothesWorld ⬈
Next.js E-commerce Website
Used Technologies
- Frontend: Next.js 14, React.js 18
- Backend: MongoDB and Prisma
- Styling: Tailwind CSS and Shadcn UI
- **Project Github Link** ⬈

2023

Customer Flutter App ⬈
Flutter Project with Node.js Backend Web API
Customer App allows users to perform basic CRUD operations with Customer Backend without state management packages.
